Colloids and Surfaces, 27 (1987) 376–379
Elsevier Science Publishers B.V., Amsterdam — Printed in The Netherlands

Subject Index

Acidity,
On the factors governing the behaviour of ferric oxide gels as ion exchangers — structural features, porous texture, capacity and — (Petro et al.) 81
Acrol LG-21,
The adsorption of oleate and the guar-based gum, — , onto apatite and calcite (O'Connor et al.) 357
Adsorption,
— of hydrolyzable surfactants: Effect of precipitation on adsorption of oleate on hematite (Morgan et al.) 15
On the charge stoichiometry upon — of a cationic polyelectrolyte on cellulosic materials (Wågberg et al.) 163
The — of cetyltrimethylammonium bromide on aqueous surfaces of sodium bromide solutions (Okuda et al.) 187
The — of oleate and the guar-based gum, acrol LG-21, onto apatite and calcite (O'Connor et al.) 357
The mechanism of phospholipid — from vesicle dispersions onto glass surfaces (Jackson et al.) 325
Adsorption displacement,
— of proteins by surfactants in oil-in-water emulsions (De Feijter et al.) 243
Aerosols,
Preparation of uniform colloidal dispersions by chemical reactions in —. IV. Mixed silica/titania particles (Balboa et al.) 123
Ag^+ ions,
Study of the interactions of — at the grafted silica/electrolyte interface by electrophoresis and labelled ion adsorption (De, Jaffrezic-Renault) 159
Aggregate structure,
The influence of — and wetting on the dispersibility of β-copper phthalocyanine pigments in viscous printing inks (McKay, Mather) 175
Apatite,
The adsorption of oleate and the guar-based gum, acrol LG-21, onto — and calcite (O'Connor et al.) 357
Calcite,
The adsorption of oleate and the guar-based gum, acrol LG-21, onto apatite and — (O'Connor et al.) 357
Capacity,
On the factors governing the behaviour of ferric oxide gels as ion exchangers — structural features, porous texture, — and acidity (Petro et al.) 81
Cationic polyelectrolyte,
On the charge stoichiometry upon adsorption of a — on cellulosic materials (Wågberg et al.) 163
Cellulosic fibers,
Kinetics of polymer-induced flocculation of — in turbulent flow (Wågberg, Lindström) 29
Cellulosic materials,
On the charge stoichiometry upon adsorption of a cationic polyelectrolyte on — (Wågberg et al.) 163
Cement mortar.
The influence of field strength and initial water content on electroosmotic dewatering of — slurries in the presence of SDS (Kuin et al.) 65
Cetostearyl alcohol,
The characterisation of the microstructure of gels and emulsions containing — and cetrimide using electron microscopy — a comparison of techniques (Rowe, McMahon) 367
Cetrimide,
The characterisation of the microstructure of gels and emulsions containing cetostearyl alcohol and — using electron microscopy — a comparison of techniques (Rowe, McMahon) 367
Cetyltrimethylammonium bromide,
The adsorption of — on aqueous surfaces of sodium bromide solutions (Okuda et al.) 187
Charge stoichiometry,
On the — upon adsorption of a cationic polyelectrolyte on cellulosic materials (Wågberg et al.) 163
Cholesterol,
Effect of — solubilised in membranes on the interfacial water structure — a study

by water proton NMR relaxation in reverse micelles (Maitra, Patanjali) 271
Clay–organic complexes,
Determination of the surface energy of — by contact angle measurements (Jouany, Chassin) 289
Colloidal dispersions,
Preparation of uniform — by chemical reactions in aerosols. IV. Mixed silica/titania particles (Balboa et al.) 123
Conductivity,
Interlayer — of rocks — a fractal model of interface irregularities for calculating interlayer conductivity of natural porous mineral systems (Pape et al.) 97
Contact angle,
Determination of the surface energy of clay–organic complexes by — measurements (Jouany, Chassin) 289
Contact angles,
— on particles and plates (Crawford et al.) 57
Measurement of advancing and receding — inside polymer tubing (Pitt et al.) 345
β-Copper phthalocyanine,
The influence of aggregate structure and wetting on the dispersibility of — pigments in viscous printing inks (McKay, Mather) 175
Cytochrome c,
— interaction with phospholipid monolayers and vesicles (Peschke, Möhwald) 305
Electron microscopy,
The characterisation of the microstructure of gels and emulsions containing cetostearyl alcohol and cetrimide using — — a comparison of techniques (Rowe, McMahon) 367
Electroosmotic dewatering,
The influence of field strength and initial water content on — of cement mortar slurries in the presence of SDS (Kuin et al.) 65
Electrophoresis,
Study of the interactions of Ag^+ ions at the grafted silica/electrolyte interface by — and labelled ion adsorption (De, Jaffrezic-Renault) 159
Ferric oxide gels,
On the factors governing the behaviour of — as ion exchangers — structural features, porous texture, capacity and acidity (Petro et al.) 81
Flocculation,
Kinetics of polymer-induced — of cellulosic fibers in turbulent flow (Wågberg, Lindström) 29
Glass surfaces,
The mechanism of phospholipid adsorption from vesicle dispersions onto — (Jackson et al.) 325
Grafted silica/electrolyte interface,
Study of the interactions of Ag^+ ions at the — by electrophoresis and labelled ion adsorption (De, Jaffrezic-Renault) 159
Guar-based gum,
The adsorption of oleate and the —, acrol LG-21, onto apatite and calcite (O'Connor et al.) 357
Hematite,
Adsorption of hydrolyzable surfactants: Effect of precipitation on adsorption of oleate on — (Morgan et al.) 15
Hydrodynamic,
— and physicochemical aspects of spreading (Summ et al.) 43
Hydrolyzable surfactants,
Adsorption of — : Effect of precipitation on adsorption of oleate on hematite (Morgan et al.) 15
Interfacial tensiometer,
The automation of an — (Alexander, Matteson) 201
Interlayer conductivity,
— of rocks — a fractal model of interface irregularities for calculating interlayer conductivity of natural porous mineral systems (Pape et al.) 97
Ion adsorption,
Study of the interactions of Ag^+ ions at the grafted silica/electrolyte interface by electrophoresis and labelled — (De, Jaffrezic-Renault) 159
Ion exchangers,
On the factors governing the behaviour of ferric oxide gels as — — structural features, porous texture, capacity and acidity (Petro et al.) 81
Kaolinite fines,
Mobilization of — in porous media (Cerda) 219

Kinetics,
— of polymer-induced flocculation of cellulosic fibers in turbulent flow (Wågber, Lindström) 29
Magnetic pigment particle,
Rapid measurements of — size by transient magnetic birefringence methods (James) 133
Mica,
A study of surfactant solution wetting — (McGuiggan, Pashley) 277
Microstructure,
The characterisation of the — of gels and emulsions containing cetostearyl alcohol and cetrimide using electron microscopy — a comparison of techniques (Rowe, McMahon) 367
Mineral systems,
Interlayer conductivity of rocks — a fractal model of interface irregularities for calculating interlayer conductivity of natural porous — (Pape et al.) 97
Nile silt,
Some sorption properties of — (Ebeid et al.) 341
NMR,
Effect of cholesterol solubilised in membranes on the interfacial water structure — a study by water proton — relaxation in reverse micelles (Maitra, Patanjali) 271
Oil-in-water emulsions,
Adsorption displacement of proteins by surfactants in — (De Feijter et al.) 243
Oleate,
Adsorption of hydrolyzable surfactants: Effect of precipitation on adsorption of — on hematite (Morgan et al.) 15
The adsorption of — and the guar-based gum, acrol LG-21, onto apatite and calcite (O'Connor et al.) 357
Phospholipid,
Cytochrome c interaction with — monolayers and vesicles (Peschke, Möhwald) 305
The mechanism of — adsorption from vesicle dispersions onto glass surfaces (Jackson et al.) 325
Physicochemical,
Hydrodynamic and — aspects of spreading (Summ et al.) 43
Polymer tubing,
Measurement of advancing and receding contact angles inside — (Pitt et al.) 345
Porous media,
Mobilization of kaolinite fines in — (Cerda) 219
Porous mineral systems,
Interlayer conductivity of rocks — a fractal model of interface irregularities for calculating interlayer conductivity of natural — (Pape et al.) 97
Porous texture,
On the factors governing the behaviour of ferric oxide gels as ion exchangers — structural features, —, capacity and acidity (Petro et al.) 81
Precipitation,
Adsorption of hydrolyzable surfactants: Effect of — on adsorption of oleate on hematite (Morgan et al.) 15
Printing inks,
The influence of aggregate structure and wetting on the dispersibility of β-copper phthalocyanine pigments in viscous — (McKay, Mather) 175
Proteins,
Adsorption displacement of — by surfactants in oil-in-water emulsions (De Feijter et al.) 243
SDS,
The influence of field strength and initial water content on electroosmotic dewatering of cement mortar slurries in the presence of — (Kuin et al.) 65
Silica/titania particles,
Preparation of uniform colloidal dispersions by chemical reactions in aerosols. IV. Mixed — (Balboa et al.) 123
Sodium bromide solutions,
The adsorption of cetyltrimethylammonium bromide on aqueous surfaces of — (Okuda et al.) 187
Sorption properties,
Some — of nile silt (Ebeid et al.) 341
Spreading,
Hydrodynamic and physicochemical aspects of — (Summ et al.) 43
Surface energy,
Determination of the — of clay-organic complexes by contact angle measurements (Jouany, Chassin) 289
Surface tension,

The uncertainty in absolute values of — of water (Gaonkar, Neumann) 1
Transient magnetic birefringence,
Rapid measurement of magnetic pigment particle size by — methods (James) 133
Turbulent flow,
Kinetics of polymer-induced flocculation of cellulosic fibers in — (Wågberg, Lindström) 29
Water,
The uncertainty in absolute values of surface tension of — (Gaonkar, Neumann) 1
Water structure,
Effect of cholesterol solubilised in membranes on the interfacial — — a study by water proton NMR relaxation in reverse micelles (Maitra, Patanjali) 271
Wetting,
A study of surfactant solution — on mica (McGuiggan, Pashley) 277
The influence of aggregate structure and — on the dispersibility of β-phthalocyanine pigments in viscous printing inks (McKay, Mather) 175
